

## The Rejuvenating Skin Benefits of Oxygen Facials

### The Benefits of Oxygen for Skin

Oxygen offers numerous benefits for a healthy-looking, radiant complexion.

Not only is it known to help revitalize the appearance of collagen-depleted skin and add brightness to an otherwise lackluster complexion, but it also helps clean out clogged pores and clarify troubled skin. Overall, a proper oxygen facial will deliver a gorgeous glow and a fresh, uplifted look.

Afterward, you'll look like you've just emerged from a long, relaxing day at the spa.

### What does the image O2 facial do?

Our revolutionary O2 lift oxygenating facial masque effervesces upon application harnessing a unique "foam burst" technology to create illuminated skin in literally minutes. This exceptional mask features Fiflow®, which delivers oxygen to the skin to **energize, purify and brighten the appearance of the skin instantly.**

### How to Spot an Effective Oxygen Skin Treatment

Many people have, unfortunately, received so-called oxygen treatments only to receive subpar facials in the form of simple sheet masks and machines that blow oxygen into the skin—with fleeting results. A good oxygen treatment will include professional-grade skincare formulas that feature high-performance ingredients such as plant-derived stem cells and peptides to boost skin along with the oxygen. After all, it's the skincare that stays on your skin to make a visible difference!
